

# COMBINATION/VACTOR UNITS

We at SPH Plant currently have 8 high pressure jetting and/or suction units in our fleet, which have been custom built to our specifications. Having a diverse fleet allows us to carry out a variety of work for our customers and deal with every type of heavy duty requirement.

## EUROVAC 1000

**We have 3 Eurovac 1000 units in our fleet, each with the following specifications:**

4x2 chassis

Up to 65gpm jetting pressure at 2000psi

Up to 300 metres of thermoplastic jetting hose

High airflow up to 3000cfm

1000 gallon water capacity

1000 gallon sludge capacity

Rear-mounted 180 degree boom

## EUROVAC 1200

**We have 2 Eurovac 1200 units in our fleet - one on a 6x4 chassis, one on a 6x6 off-road chassis - each with the following shared specifications:**

Up to 95gpm jetting pressure at 2600psi

Up to 300 metres of thermoplastic jetting hose

High airflow up to 4700cfm

1200 gallon water capacity

1200 gallon sludge capacity

Rear-mounted 180 degree boom

## COMBINATION/VACTOR UNITS

Our Fleet is designed to clear large bore pipelines and culverts and for the collection of wet and dry materials, including heavy sludge, compacted sewage and solids such as bricks and bottles.

### EUROVAC 2000

**We have 2 Eurovac 2000 units in our fleet, which have the largest water and sludge capacities of our combination units. Both units have the following specifications:**

- 8x4 chassis
- Up to 95gpm jetting pressure at 2600psi
- Up to 300 metres of thermoplastic jetting hose
- High airflow up to 4700cfm
- 2000 gallon water capacity
- 2000 gallon sludge capacity
- Rear-mounted 180 degree boom

### ARTIC 'SUPER VAC'

**We have one Artic 'Super Vac', which is a suction only unit ideal for larger/heavier debris, with the following specifications:**

- Very high airflow of 8000cfm
- 8" suction tube
- 180 degree remote controlled boom
- 14000kg debris capacity
- Stainless tank

**AVAILABLE FOR SHORT TERM HIRE OR LONGER TERM CONTRACT/LEASE HIRE**
